First Call for Papers

Fifth IEEE International Symposium on Requirements Engineering (RE'01)

27th–31st August 2001, Toronto, Canada

http://www.re01.org/

Sponsored by the IEEE Computer Society's Technical Council on Software Engineering (TCSE)
In cooperation with ACM SIGSOFT, IFIP WG 2.9 and INCOSE RWG

General Chair:
Steve Easterbrook
University of Toronto, Canada

Programme Chair:
Bashar Nuseibeh
Imperial College, UK

Tutorials Chair:
Nancy Mead
CMU/SEI, USA

Doctoral Workshop Chair:
Annie Antón
North Carolina State University, USA

Exhibition Chair:
Armin Eberlein
University of Calgary, Canada

Posters & Research Demos:
Eric Yu
University of Toronto, Canada

Finance Chair:
Joanne Atlee
University of Waterloo, Canada

Publicity Chairs:
Marsha Chechik
University of Toronto, Canada

Neil Maiden
City University, UK

Hisayuki Horai
Fujitsu, Japan

Programme Committee:
Annie Antón, USA
Joanne Atlee, Canada
Dan Berry, Canada
Marsha Chechik, Canada
Betty Cheng, USA
Eric Dubois, Belgium
Martin Feather, USA
José Fiadeiro, Portugal
Steve Fickas, USA
Anthony Finkelstein, UK
Carlo Ghezzi, Italy
Martin Glinz, Switzerland
Michael Goedicke, Germany
Sol Greenspan, USA
Anthony Hall, UK
Mats Heimdahl, USA
Constance Heitmeyer, USA
Michael Jackson, UK
Stan Jarzabek, Singapore
Simon Kaplan, Australia
Julio Cesar Leite, Brazil
Pericles Loucopoulos, UK
Kalle Lyytinen, Finland
Robyn Lutz, USA
Andreas Opdahl, Norway
Neil Maiden, UK
John Mylopoulos, Canada
Klaus Pohl, Germany
Colin Potts, USA
Suzanne Robertson, UK
William Robinson, USA
Colette Roland, France
Linda Rosenberg, USA
Alessandra Russo, UK
Kevin Ryan, Ireland
Motoshi Saeki, Japan
Jawed Siddiqi, UK
Alistair Sutcliffe, UK
Tetsuo Tamai, Japan
Roel Wieringa, Holland
Eric Yu, Canada
Axel van Lamsweerde, Belgium
David Weiss, USA
Didar Zowghi, Australia

Requirements Engineering (RE) lies at the heart of software development. RE is concerned with identifying the purpose of a software system, and the contexts in which it will be used. Hence, RE acts as the bridge between the real world needs of users, customers, and other constituencies affected by a software system, and the capabilities and opportunities afforded by software-intensive technologies. RE is a multi-disciplinary activity drawing on research and experience in software engineering, computer science, business and information systems, human-computer interaction, and social and cognitive sciences. In the 1990's, significant advances in RE research were made, such as the development of techniques for eliciting and analysing stakeholders' goals, modelling scenarios that characterise different contexts of use, the use of ethnographic techniques for studying organisations and work settings, and the use of formal methods for analysing safety and security requirements. Despite these advances, RE remains one of the most challenging aspects of software development.

RE'01 will provide an opportunity for researchers, practitioners, and students to exchange problems, solutions, and experiences in RE. It will emphasise the crucial role that RE plays in the development and delivery of systems, products, and services that permeate all aspects of life and increasingly serve users across national, cultural and professional boundaries. In addition to wanting systems to deliver required functions, users increasingly demand systems that are usable, reliable, secure and responsive. In a rapidly changing world, users and product managers expect today's products to be adaptable to their future technical and social environments.

RE'01 invites submissions of high quality papers describing novel research, experience, and state-of-the-art surveys in RE. Proposals for tutorials, tool demos and poster presentations are also welcome. Topics of interest include, but are not restricted to:

- Requirements elicitation through interview, observation, reverse engineering and re-engineering
- Requirements modelling, analysis and re-use, including domain modelling
- Handling non-functional and quality requirements
- Formal representation schemes and specification languages, and formal analysis techniques
- Multiple viewpoints, conflict resolution, and inconsistency management
- Prototyping, and animation and execution of requirements
- Requirements management, traceability and metrics
- Evolution of requirements over time and across product families
- RE standards, processes, methods and environments
- RE case studies and experiences
- RE and information systems development
- Interaction of RE with software architecture, design, verification & validation, and software maintenance
- Analysis of safety, reliability and other high assurance requirements
- Cognitive, social, political and cultural factors in RE
- Human-computer interaction, groupware, and CSCW aspects of RE
- Artificial intelligence techniques for RE
- RE education

Submission information

Electronic submissions will be accepted at the symposium website up to one month before the deadline. Authors without web access must make advance arrangements with the Programme Chair at least one week before the deadline. Papers must not exceed 8 pages in length, and must be in IEEE CS Press format (see http://submissions.re01.org/). Accepted papers must be accompanied by a signed IEEE copyright release form. See the symposium website for information on how to submit panel and tutorial proposals, doctoral workshop papers, posters and research demos. For any other queries, please contact ***info@re01.org***.

Evaluation

Paper submissions will be reviewed by the PC for originality, significance, soundness, and quality of presentation. Research papers must clearly present an original contribution to the state-of-the-art or practice. Experience papers must clearly present lessons learned that would be of interest and benefit to a broad audience of researchers and practitioners. Papers must describe work that has not been submitted to or presented at another forum. Revised versions of a selection of best papers from the symposium will appear in a special issue of the Requirements Engineering Journal, and authors of those papers will be offered a free one-year individual subscription to the journal.

Key Dates

Paper abstract submissions (mandatory)	15th February	2001
Full paper submissions	22nd February	2001
Notification sent to authors	2nd May	2001
Tutorial proposal submissions	6th April	2001
Doctoral workshop submissions	6th April	2001
Posters and Research Demonstrations	14th May	2001
Camera-ready submissions	1st June	2001
