

I bet she's thinking about another guy

How the heck do you prove that 3D matching is NP-complete?

3-dimensional matching

$$A = \{a, b, c, d\}$$

$$B = \{w, x, y, z\}$$

$$C = \{1, 2, 3, 4\}$$

$$T = \{(a, x, 1), (a, z, 4), \\ (b, x, 2), (b, x, 3), \\ (c, w, 3), (c, x, 3), \\ (d, y, 1), (d, x, 2)\}$$

Tripartite matching

$$A = \{a, b, c, d\}$$

$$B = \{w, x, y, z\}$$

$$C = \{1, 2, 3, 4\}$$

$$T = \{(a, x, 1), (a, z, 4), \\ (b, x, 2), (b, x, 3), \\ (c, w, 3), (c, x, 3), \\ (d, y, 1), (d, x, 2)\}$$

Matching M

Tripartite matching

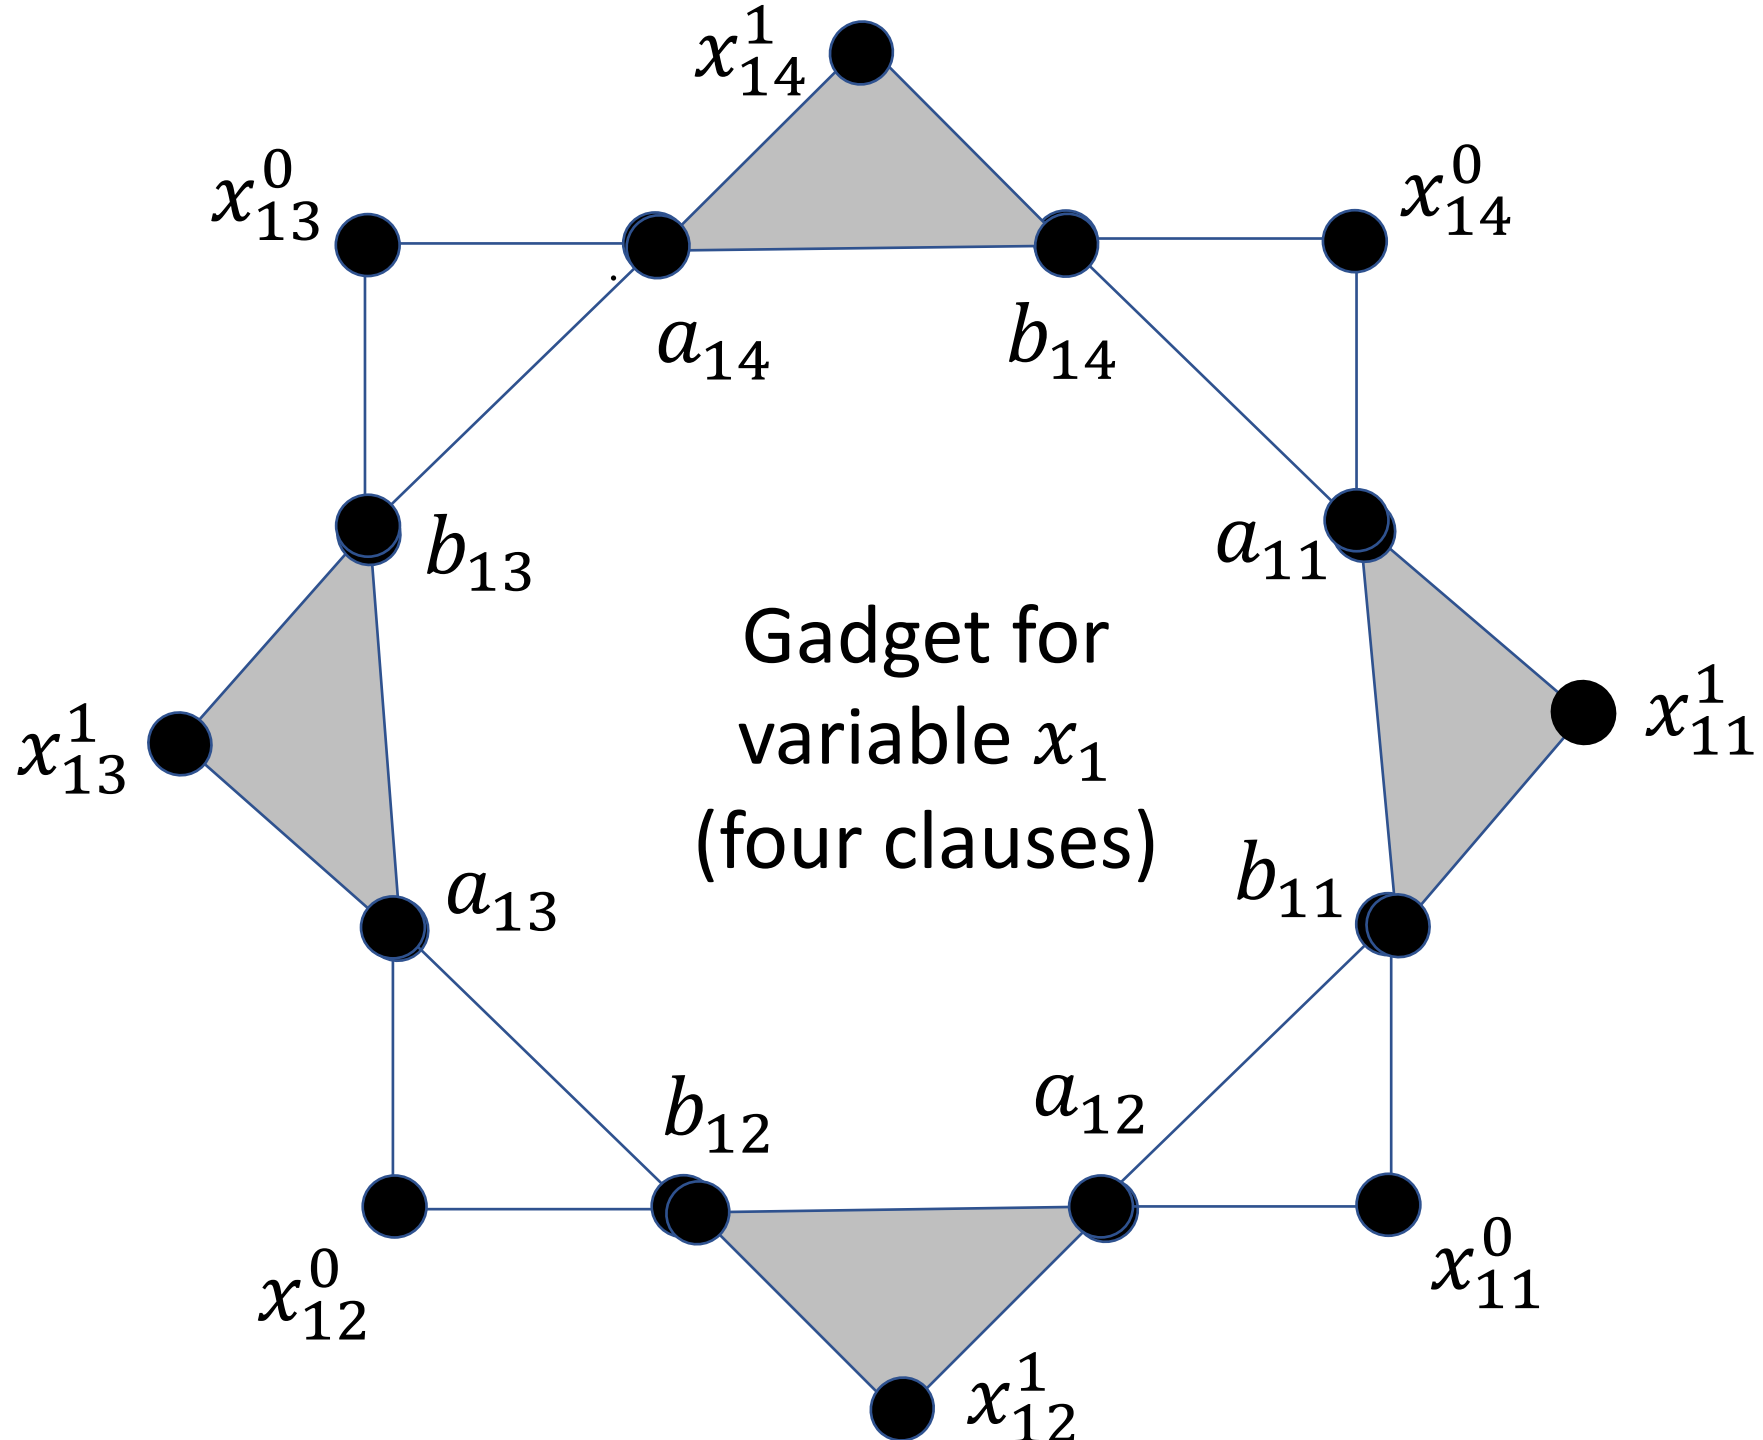

$$A = \{a, b, c, d\}$$

$$B = \{w, x, y, z\}$$

$$C = \{1, 2, 3, 4\}$$

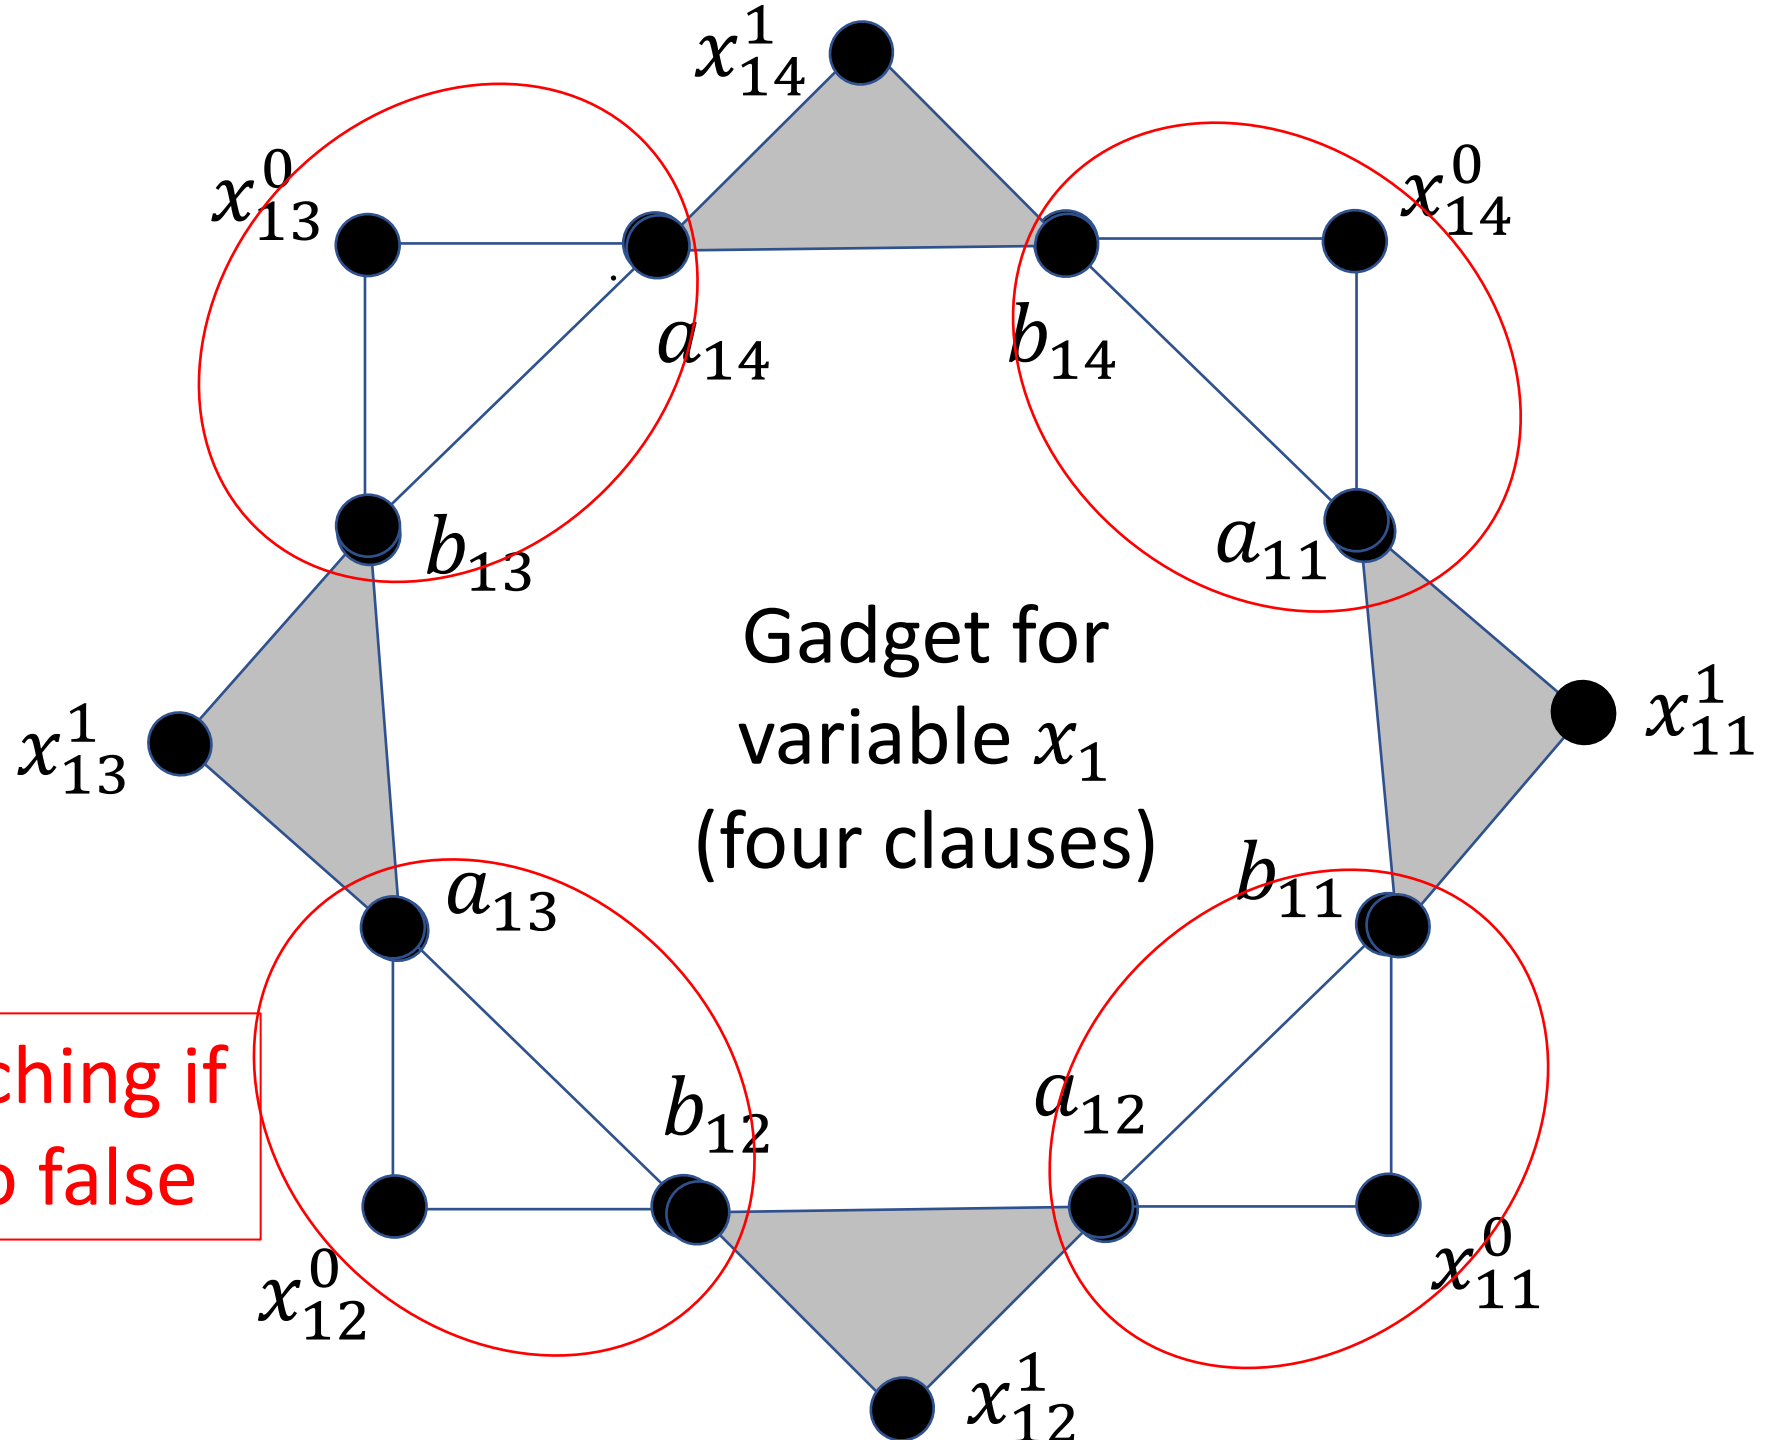

$$T' = \{(a, x, 1), (a, z, 4), \\ (b, x, 2), (b, x, 3), \\ (c, w, 1), (c, x, 3), \\ (d, y, 1), (d, x, 2)\}$$

No matching!

In the matching if x_1 is set to true

x_{14}^1

x_{13}^0

x_{14}^0

a_{14}

b_{14}

b_{13}

a_{11}

x_{13}^1

x_{11}^1

Gadget for variable x_1 (four clauses)

a_{13}

b_{11}

In the matching if x_1 is set to false

b_{12}

a_{12}

x_{12}^0

x_{11}^0

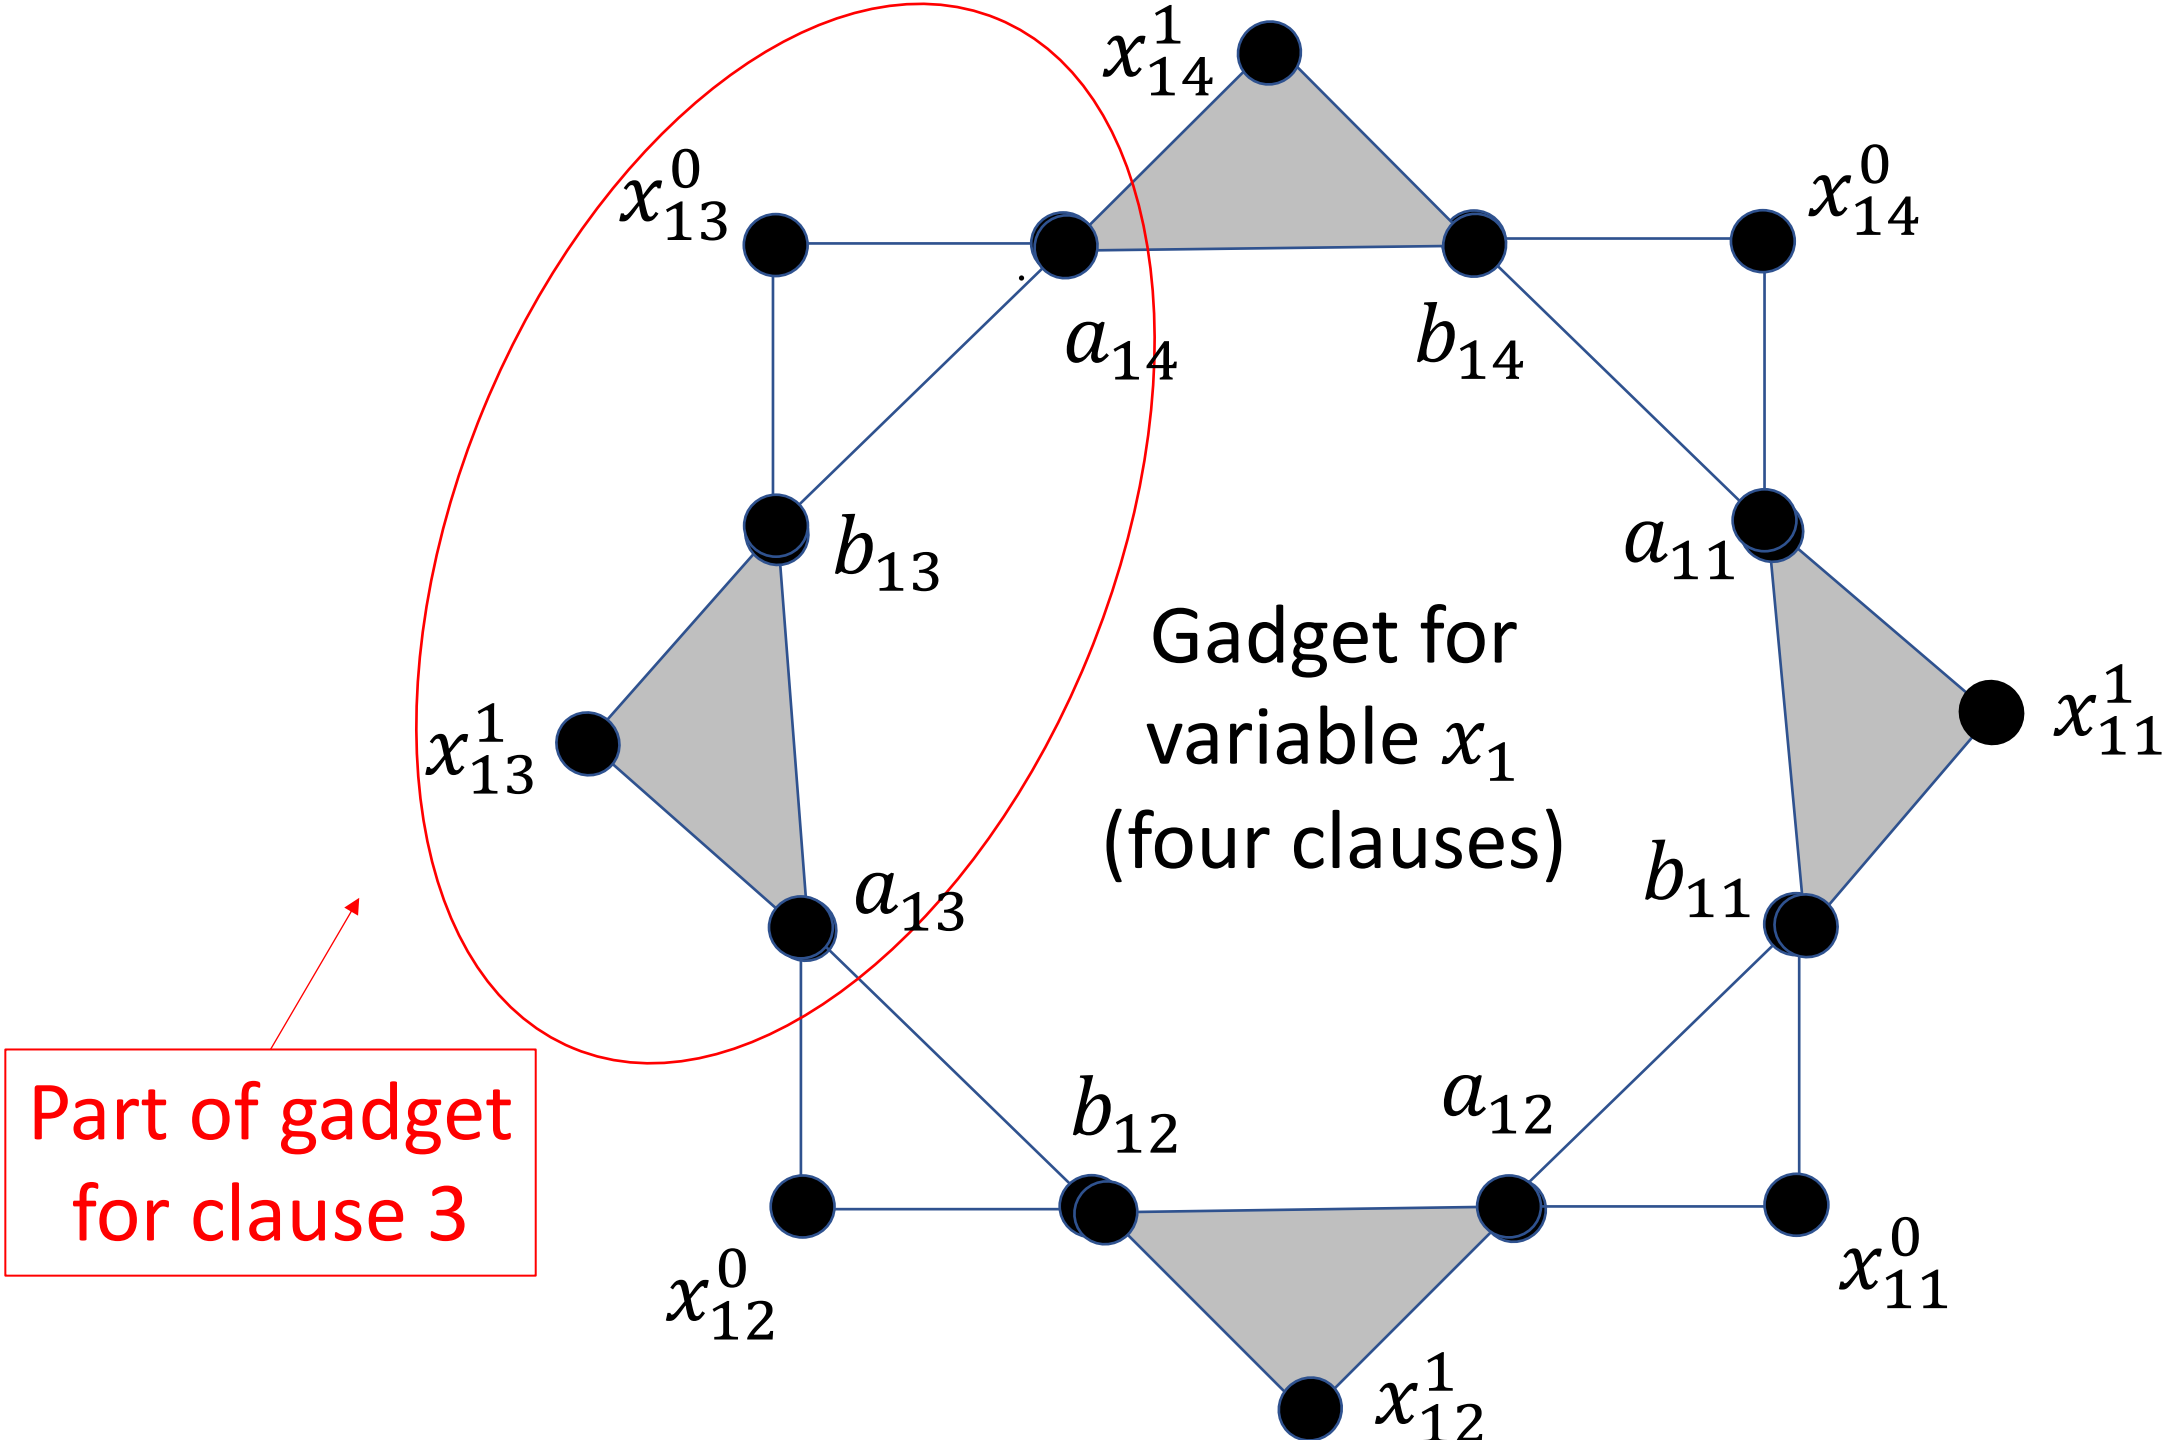

x_{12}^1

Gadget for variable x_1
(four clauses)

Part of gadget
for clause 2

Part of gadget
for clause 4

$a_1 \bullet \bullet b_1$

$$\bar{x}_1 \vee x_2 \vee \bar{x}_3$$

The Universe of elements U

An exact cover of \mathcal{S}
