Figure 8.4 Method parameters (continued).

What does this print?

```
public class Test {
    private static void makeEx (Ex e) {
        e = new Ex();
        e.field = 4;
        System.out.println(e.field);
    }
    public static void main (String[] args) {
        Ex e = new Ex();
        makeEx(e);
        System.out.println(e.field);
    }
}
```

Now it's getting confusing! Here's what happened:
