STUDENT NUMBER:

LAST NAME:

FIRST NAME:

*Do NOT turn this page until you have received the signal to start.
(In the meantime, please fill out the identification section above,
and read the instructions below.)*

This exam consists of 3 questions on 4 pages (including this one) *When you receive the signal to start, please make sure that your copy of the examination is complete.*

Please answer questions in the space provided. You will earn 20% for any question you leave blank or write "I cannot answer this question," on. You will earn substantial part marks for writing down the outline of a proof and indicating which steps are missing.

Write your student number at the bottom of pages 2-4 of this test.

1: _____/ 5

2: _____/ 5

3: _____/ 5

TOTAL: _____/15

Good Luck!

QUESTION 1. [5 MARKS]

Define $f(n)$ as:

$$f(n) = \sum_{i=0}^{2n+1} 7^i$$

Prove that $f(n)$ is divisible by 8 for all $n \in \mathbb{N}$.

QUESTION 2. [5 MARKS]

For $n \in \mathbb{N}$, define $B(n)$ as:

$$B(n) = \begin{cases} 1, & n = 0 \\ 1, & n = 1 \\ B(n-2) + B(n-1), & n > 1 \end{cases}$$

Prove that $B(n+2) - \sum_{i=0}^n B(i) = 1$ for all $n \in \mathbb{N}$.

QUESTION 3. [5 MARKS]

Let $PV = \{v, w, x, y, z\}$ be a set of propositional variables. Define a special set of propositional formulas \mathcal{F}^* as the smallest set such that

BASIS: Any propositional variable in PV belongs to \mathcal{F}^* .

INDUCTION STEP: If P_1 and P_2 belong to \mathcal{F}^* , then so do $(P_1 \wedge P_2)$, $(P_1 \vee P_2)$, $(P_1 \rightarrow P_2)$ and $(P_1 \leftrightarrow P_2)$.

For a propositional formula f , define $\text{cn}(f)$ as the number of instances of connectives from $\{\vee, \wedge, \rightarrow, \leftrightarrow\}$ in f . Define $\text{pv}(f)$ as the number of instances of propositional variables from $\{v, w, x, y, z\}$ in f .

Use structural induction to prove that for all $f \in \mathcal{F}^*$, $\text{pv}(f) = \text{cn}(f) + 1$.

Total Marks = 15
