Instructor

Philip Edmonds	office:	SF4008C
	phone:	978-5182
	e-mail:	`pedmonds@cs`
	office hours:	Mondays – Thursdays, 3:00–4:00 p.m., or by appointment

Classes

Lectures:	Tuesdays and Thursdays	10:00–11:00 a.m.	MP102
Tutorials:	Tuesdays	11:00–12:00 a.m.	see table

Birth Month	Tutor	Room
Jan-Apr	Karen Reid	MP102
May-Aug	Chi Keung Luk	LM123
Sep-Dec	Michalis Faloutsos	LM155

Tutors will hold lab hours (at the Sig Sam CDF-PC site). The dates and times will be posted on the course web page.

Course Materials

Read section 4 of the *Course Handbook* for a complete description of the required and optional items. You will probably buy (from the bookstore):

- *Data Structures: An Object-Oriented Approach.* Preliminary Edition. D.T. Barnard, R.C. Holt, J.N.P. Hume. Holt Software Associates, Inc. 1995.
- *Computer Science 148 Course Handbook.* Fall 1995 and Spring 1996 edition. D. Horton (ed.).
- *Computer Science 148 Lecture Notes.* Fall 1995 edition. F. Fich and D. Horton.
- *How to Prepare Programs on the Computer Science PC Facility.* May 1996 edition. J.N. Clarke (ed.).

Amendments to the Course Handbook

Important: The *Course Handbook* contains general information about the course. When reading it, you should keep the following term specific amendments in mind. There is no CSC 148 course coordinator in the summer. Therefore all your dealings will be with your instructor. The late policy is changed, as noted below. The CDF-PC site has changed slightly; see below.

Computer Usage and Course Notices

Course web page: `http://www.cs.toronto.edu/~pedmonds/148/home.html`
Course newsgroup: `ut.cdf.csc148h`

Handouts, assignments, solutions, marks, and important course information will be posted periodically on the web page. Important notices will also be posted in the course newsgroup. You should login regularly to check.

Note: The CDF-PC sites have undergone a few minor changes. The Sid Smith site has been moved and combined with the Sig Sam site, making the Sig Sam site the only site for the summer. Student accounts now begin `h148xxxx`, and TA accounts begin `ta148xxx`. The changes are reflected in the new May 1996 edition of the CDF-PC manual, noted above.

Grading Scheme

Assignments	40%
Midterm Test	20%
Final Exam	40%
	100%

To pass the course, you need a total mark of at least 50%, *and* you must receive at least 40% on *both* the exam and the term work (assignments plus midterm test).

The midterm will be one hour long and will be held during the lecture period on **July 4, 1996** from **10:00–11:00am**. The exam will be three hours long, and will be held in the week of August 12–16. It is expected that both tests will be open book.

Assignments

Assignment	Tentative topic	Weight	Due at **6 p.m. in the drop box**
1	warmup	1%	Thur., May 30 (week 3)
2	proving iterative code correct	12%	Thur., June 20 (week 6)
3	pointers; big-oh	12%	Thur., July 18 (week 10)
4	recursion; OO programming	15%	Thur., August 8 (week 13)

Late Policy

The late policy is strict. **Note: it is different from that described in section 7.1 of the *Course Handbook*.** Assignments must be submitted to the 148 drop boxes on the second floor of the Sandford Fleming building, near room 2305A. (They are between the elevators and the bridge to the D.L. Pratt Building.) Assignments will not be accepted anywhere else. Assignments are due at **6 p.m. on Thursday, sharp**. The deadline for late assignments is 9 a.m. on the Monday following the due date. The penalty for late assignments is 30%. For instance, an assignment that would have been worth 80/100 if it were on time, will earn 50/100 if submitted late. Late assignments must also be submitted to the drop box, and nowhere else. You may submit at most one assignment late; any subsequent late assignments will receive a mark of zero.

Special Consideration and Remarking

You may request special consideration in the event of an illness or other catastrophe. Supporting documentation is required (e.g., a medical certificate). Fill out the 'Request for Special Consideration' form and return it and the documentation to your instructor.

Requests for remarking must be accompanied by a filled-out 'Request for Remarking' form.

Please use the forms found on the course web page (in the handouts section), instead of the ones in the *Course Handbook*.

Important Dates

Friday, June 14:	last day to switch to CSC 108
Friday, July 19:	last day to drop the course without academic penalty
Thursday, August 8:	last lecture
