## CSC408F/CSC2105F Software Engineering

Fall 2004/2005

Please spend some time answering the survey. Your answer may help the instructor to make the course more targeted.

1. Describe the largest software (program) you have built? What is the name and the purpose of the software? What have you achieved from the software: money, praise or experience?
  
2. Do you remember the LOC of the software?
  - (a) A. < 1000
  - (b) B. < 10,000
  - (c) C. < 100,000
  - (d) D. > 100,000
  
3. How many people were involved in the development team?
  - (a) A. 1
  - (b) B. 2-5
  - (c) C. other:
  
4. How long did it take to complete it?
  - (a) A. in one day
  - (b) B. in one month
  - (c) C. in one year
  - (d) D. other:
  
5. Did you ever find any bugs in the software, who found them (yourself or user), and how did you fix them? Do you think there are still bugs?
  
  
  
  
  
  
  
  
  
  
6. Which programming language was used?
  - (a) A. C/C++
  - (b) B. Java
  - (c) C. other:
  
  
  
  
  
  
  
  
  
  
7. List at most two killer applications you think that dominate the following markets:

- Text Editor:
- Data Processing:
- Website construction:
- Software documentations:
- Design:
- Testing:
- Software automations:

8. What do you think that the course is about and what do you expect to learn from the course?
