; Bottom-up design.
;
; Name parts of the process, and build up.

; For ‘kaleidoscope’, first the process of an image beside a version facing it.  
(requiere picturing-programs)

; image -> image
(define (facing an-image)  
    (beside an-image (flip-horizontal an-image)))

; Examples using it:

(facing  
)

(facing  
)

; image -> image
(define (facing-vertical an-image)  
    (above an-image (flip-vertical an-image)))

(facing-vertical  
)
(facing-vertical (facing

; image -> image
(define (kaleidoscope an-image)
  (facing-vertical (facing an-image))))
