(require picturing-programs)

; Why describe the process to a machine?
; Make the machine do repetition we don't want to do ourselves.

; Name the original image value to prepare to abstract and name the process,
; and then the machine can repeat it for us for any image.

(define giraffe

; Then we can comment that out and reconsider our giraffe.

; Re-write the expression, using the name instead of the image.

"Two cats reflecting:"
