Job Posting - Teaching Assistant Position – CUPE 3902, Unit 1
Summer 2026 term (May 1, 2026 – Aug. 31, 2026)

Posted on April 13, 2026 as an Emergency Posting

The Department of Computer Science seeks ~2 Prep TA(s) for the following course:

CSC263H1Y-PrepA/B– Data Structures and Analysis

Visit link for course description: <https://artsci.calendar.utoronto.ca/course/csc263h1>

Note: Prep TAs are hired to do preparatory work for Fall/Winter 2026-2027 courses during the summer term. They are not hired as regular TAs for summer course offerings.

Qualifications

Experience with CSC263 (or CSC265 or CSCB63) as a teaching assistant or sessional instructor. A strong background in theoretical computer science (as would be obtained by enrolment in a graduate degree in the theory group). Demonstrated mastery of core data structures (e.g., heaps, balanced search trees, hash tables, disjoint sets), fundamental graph algorithms (e.g., BFS/DFS, minimum spanning trees), and complexity analysis (worst-case, average-case, amortized). Strong organizational, communication, and time-management skills. Attention to detail. Experience with Python programming and online Python Notebooks.

Relevant Criterion

Previous experience is the more relevant criterion than the need to acquire experience in respect of this posted position.

Duties

1 TA required for the following duties: Lead the design and development of original problems and quiz questions for CSC263 assignments, tutorials, and examinations, and produce complete, high-quality solutions with clear, consistent marking schemes.

1 TA required for the following duties: Developing new assignments, including assignment handouts and marking instructions. Also developing quiz questions, exam questions, solutions, and marking schemes. Creating online Python coding exercises (such as Jupyter Notebooks or Google Colab Notebooks) for use during lecture presentations of data structures topics.
