Relevant Criterion

Previous experience is the more relevant criterion than the need to acquire experience in respect of this posted position.

Duties

This position will support the redevelopment of project-based teaching materials for an undergraduate introductory Human-Computer Interaction (HCI) course, with a particular focus on the evolving role of generative AI in design and learning workflows. The goal of this position is to define pedagogically appropriate uses of AI within course assignments and to update project descriptions and grading rubrics to align with course learning objectives and current design practices.

Specifically, the duties will include:

- Creating 2–3 example project deliverables with assistance from ChatGPT, Gemini, and/or other generative AI tools, including documentation of how AI assistance was used.
- Defining the appropriate scope and limits of AI assistance in relation to the learning objectives of the course, including guidance on what AI tools should and should not be used for.
- Revising project deliverables and grading rubrics to reflect updated course objectives and AI-related policies.
