

CSC303: Final Assessment

Released April 11th at 9:00AM, Due April 13 at **9:00AM**, Toronto Time

Be sure to include your name and student number on the last page of the test. All tests are to be submitted on Markus. You CANNOT submit the final late. Any legible PDF will be accepted, but illegible solutions will get a mark of zero.

Since time is short, you may want to consider writing your solutions on paper and submitting a scan/photograph of them – just bear in mind that Markus has a filesize limit of approx. 5MB, so you may have to compress your PDF if go this route. If you're a quick typesetter or have the time, then I strongly suggest typesetting your solutions (e.g., in L^AT_EX). The final's .tex file is on Quercus.

You will receive 20% of the points for any (sub)problem for which you write “I do not know how to answer this question.” You will receive 0% if you leave a question blank. If you submit irrelevant or erroneous answers, you will receive 0 points. You may receive partial credit for the work that is clearly “on the right track.”

The only resources you are allowed to consult are material from this class and the prerequisite classes (e.g., lecture slides, E&K textbook, tutorial recordings, your own notes from this or prerequisite classes, etc...). You are **not** allowed to collaborate with other students, or to consult the internet.

If you have a question, then please email me or make a private post on the message board, and I will reply to you. I will try to answer questions as I receive them between 9AM and 5PM. Outside of these times I'll do my best, but I can't make any guarantees. I will put any clarifications that I think are of value onto the message board. Any corrections will be announced via Quercus, in addition to the message board.

You have **2 days** to work on the test (From April 11 at 9AM to April 13 at **9AM**). It *should* only take you 3-6 hours to finish the final. We may have misjudged the difficulty – so please don't panic if you complete the final faster or slower.

Please read all questions before beginning, and contact me if you have any questions ASAP. Make sure to check the course forum to see if I've posted a clarification there.

As always, do try to remember that you are far more than just a grade, and that you have already shown remarkable skill and effort.

Good luck! :-)
