

CSC309 Week 2 Polls & Answers

Q1: What's the color of Fermi's cat?

- Gray
- Black
- Rainbow
- Gray and White (**right answer**)

Q2: What should NOT be pushed to git?

- node_modules (**right answer**)
- .env (**right answer**)
- .DS_Store (**right answer**)
- README

This is a multiple choice question, you have to choose all three of them to get the question right.

Q3:

Consider the following code:

```
const obj = {
  name: "Joyce",
  greet: () => console.log(this.name),
};

const anotherObj = {
  name: "Suhani",
  greet: obj.greet,
};

function globalGreet() {
  console.log(this.name);
}

const boundGreet = obj.greet.bind({ name: "Fermi" });

obj.greet();
```

```
anotherObj.greet();  
globalGreet();  
boundGreet();
```

What are the outputs of the following function calls in order?

1. obj.greet()
2. anotherObj.greet()
3. globalGreet()
4. boundGreet()

Options:

- Joyce, Suhani, undefined, undefined
- undefined, undefined, undefined, Fermi **(right answer)**
- Joyce, undefined, undefined, Throws a TypeError
- undefined, Throws a TypeError, undefined, Fermi
- Joyce, Suhani, Throws a TypeError, Fermi

Q4:

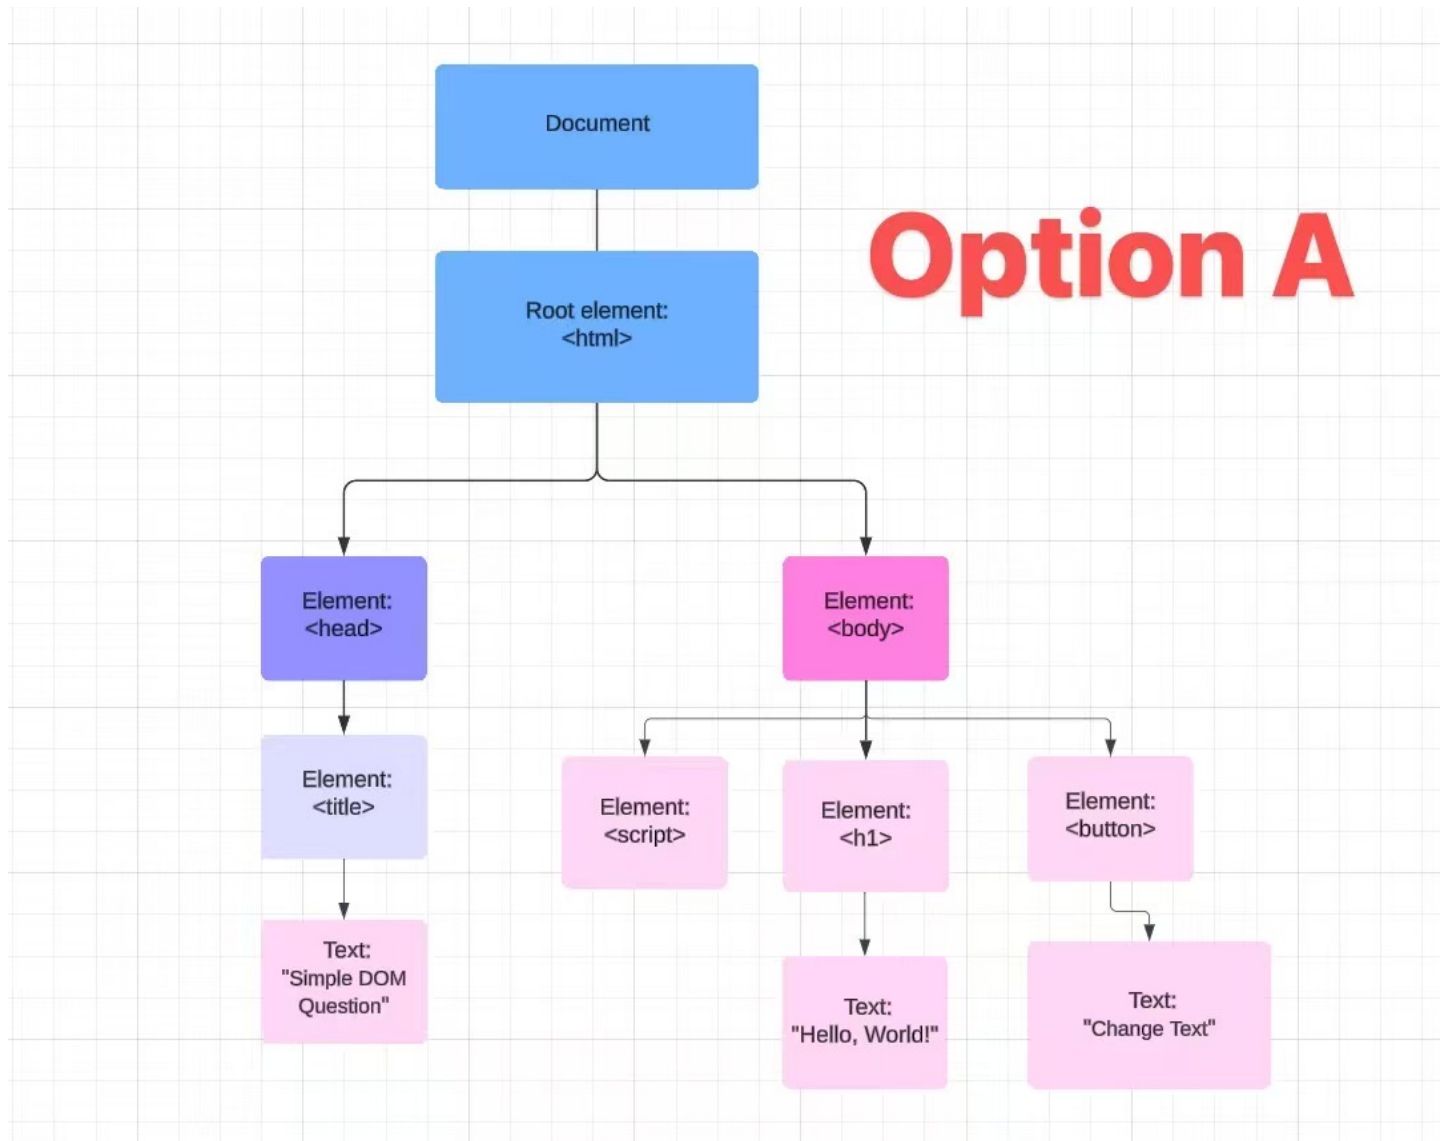

Given the following HTML and JavaScript:

```
<!DOCTYPE html>  
<html lang="en">  
<head>  
  <title>Simple DOM Question</title>  
</head>  
<body>  
  <h1 id="title">Hello, World!</h1>  
  <button id="changeText">Change Text</button>  
  
  <script>  
    const title = document.getElementById("title");  
    const button = document.getElementById("changeText");  
  
    button.addEventListener("click", function () {
```

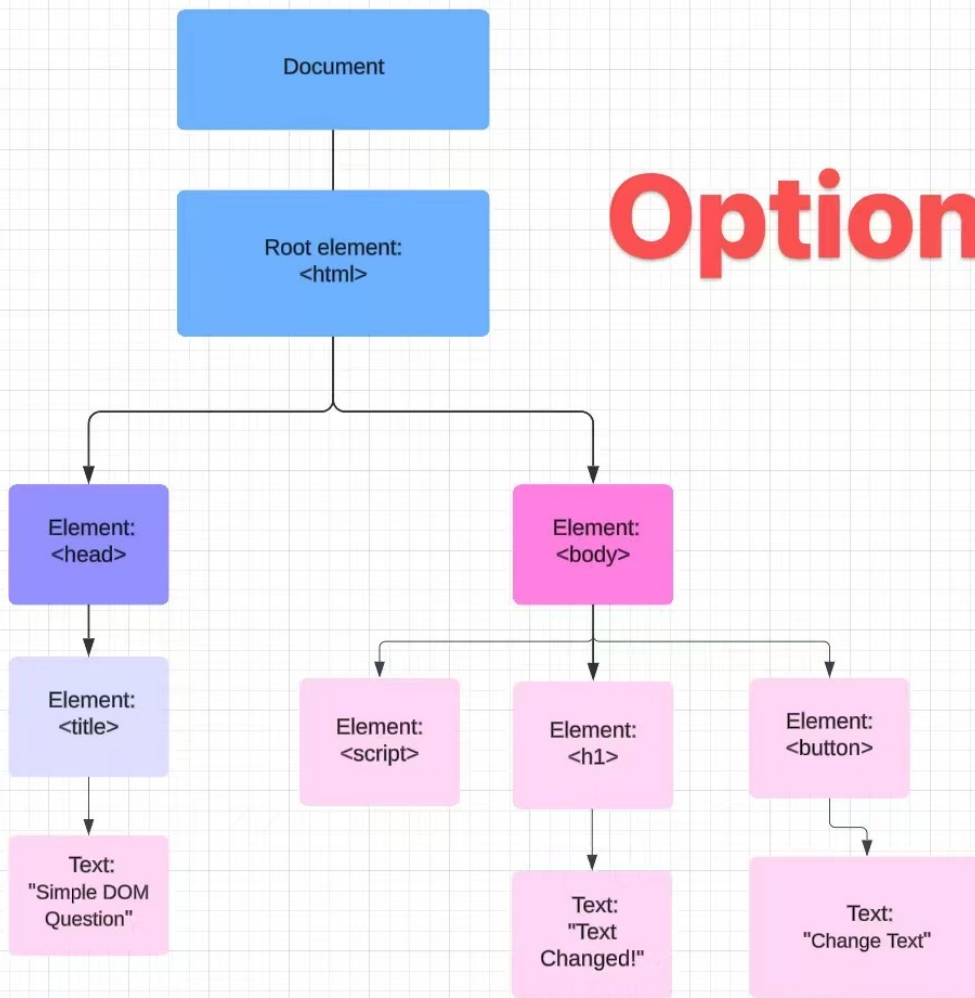

```
    title.textContent = "Text Changed!";  
  });  
</script>  
</body>  
</html>
```

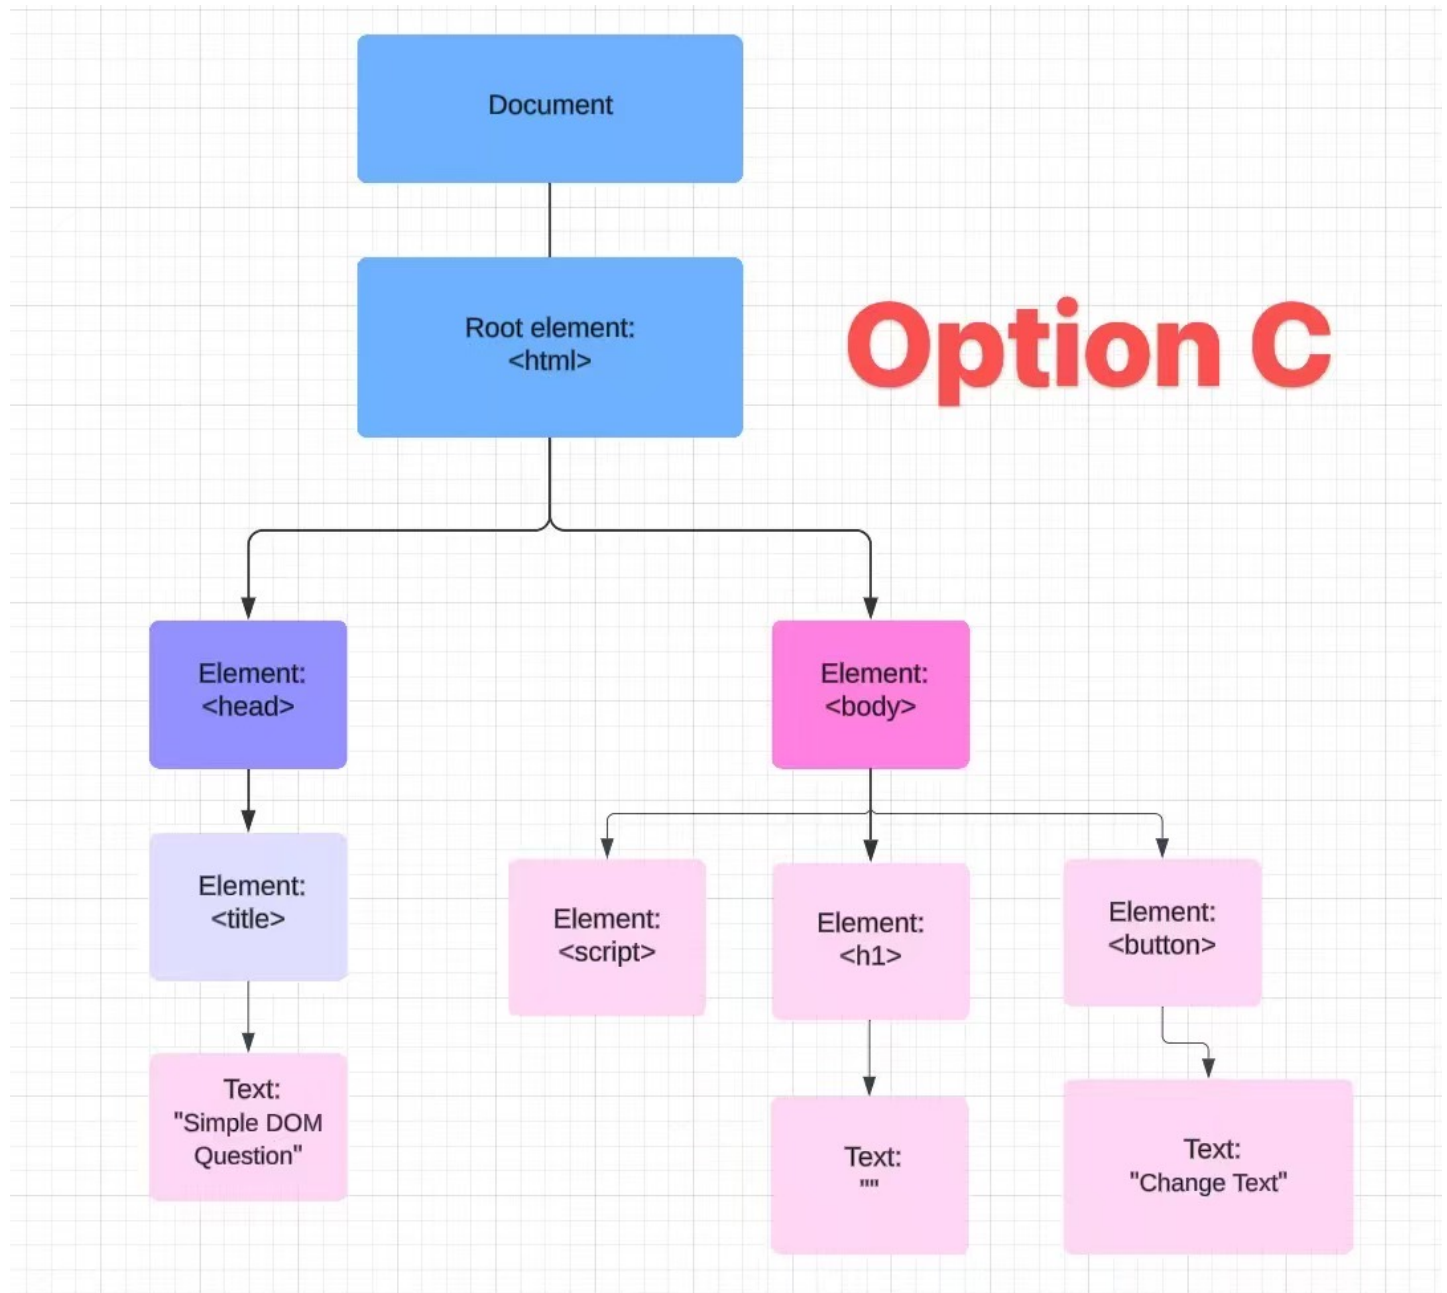

What will the DOM tree look like after the button is clicked?

Options:

Option B

Option D: No change to the DOM tree.

Option B is the right answer.
