CSC290. SMCR Model of Communication

1. The following error messages are written by web developers, intended to be read by users of a social networking website. Will users understand these messages? Improve the messages if possible.

- Names cannot contain non-ASCII characters.
- ERROR: YOUR USERNAME MUST BE ALPHANUMERIC.
- Login Error: Valid authentication credentials were not provided.
- Sorry, an unexpected error just occurred.
- The problem you are experiencing may be potentially related to your use of the browser "Back" and "Forward" button in the registration process. In general, you will get better results by avoiding those buttons during the registration process.

2. Read the blog post “Undervalued Software Engineering Skills: Writing Well”. Who do you think is the intended audience? What **goal** is the author trying to accomplish? How did the author’s choice of **structure** and aspect of the **medium** support the goal?
