

CSC290. How to read a paper.

Do a “first pass” read of the paper you were assigned, and answer these questions:

1. What is the problem the author is trying to solve? In other words, what is the research question?
2. What is the author’s answer to that question? In other words, what did the author conclude?
3. What is the author’s methodology?
4. Write a short description of what the paper is about, so that your classmates can determine whether they would want to read the paper.
