

# Tentative Marking Scheme

Assignment 2 will be autograded. Unlike in Assignment 1, there will be no TA grading. This is to schedule more TA office hours and to help you

The tentative marking scheme is as follows:

- Warmup: 10%
- Literal values: 10%
- Variables: 10%
- Plus, Times, Equal: 10%
- Plus, Times, Equal, Literal, Variables: 10%
- Lambda (with literals/variables): 5%
- Lambda (with builtins): 10%
- Function Application (with literals/variables): 5%
- Function Application (with builtins): 10%
- Function Application (unique naming): 5%
- Lambda + Function App (with builtins, unique naming): 5%
- If expressions (with builtins): 5%
- All expressions together: 5%

Note that the marking scheme *is subject to change*. I am posting this so you have a rough idea of the grading distributions that I have in mind.
