
Research Interests

Algorithmic fairness, computational social choice, voting, fair division, game theory, mechanism design, multiagent systems, incentives in machine learning.

Appointments

Assistant Professor Aug 2017 - Present

*Department of Computer Science
University of Toronto, Canada*

Research Lead for Ethics of AI Jul 2022 - Present

Faculty Affiliate Sep 2020 - Jul 2022

Schwartz Reisman Institute for Technology and Society (SRI)

Faculty Affiliate Oct 2019 - Present

Vector Institute

Postdoctoral Fellow Sep 2016 - Jul 2017

Center for Research on Computation and Society (CRCS)

Harvard University, USA

Supervisors: David C. Parkes and Yiling Chen

Education

Ph.D. in Computer Science Aug 2011 - Aug 2016

Carnegie Mellon University, USA

Thesis Title: Optimal Social Decision Making

Advisor: Ariel D. Procaccia

IFAAMAS Victor Lesser Distinguished Dissertation Award

B.Tech. in Computer Science with Honors Jul 2007 - Apr 2011

and Minor in Management

Indian Institute of Technology Bombay (IIT Bombay), India

Thesis Title: A QBF Solver Using Factor Graphs

CGPA: 9.94/10.00

President's Gold Medal

Selected Fellowships & Recognitions

Innovators Under 35, MIT Technology Review Asia Pacific 2022

Awarded annually to young innovators whose work has the greatest potential to transform the world.

SRI Faculty Fellowship, Schwartz Reisman Institute for Technology and Society 2020-21

Awarded to four faculty members across the University of Toronto for innovative and impactful research on problems at the intersection of technology and society.

AI's 10 to Watch, IEEE Intelligent Systems	2020
Awarded biennially to 10 young AI scientists with outstanding achievements.	
Victor Lesser Distinguished Dissertation Award, IFAAMAS	2016
Awarded annually to the best dissertation in the area of Autonomous Agents or Multiagent Systems.	
Facebook Graduate Fellowship, Facebook Inc.	2014-15
Awarded annually to selected graduate students conducting promising and innovative research.	
Hima and Jive Graduate Fellowship, Carnegie Mellon University	2013-14
Awarded annually to one international student in the School of Computer Science.	
President's Gold Medal, IIT Bombay	2011
Awarded annually to the top student across all programs in the graduating class at IIT Bombay.	

Public Outreach for Bias, Fairness, and Trustworthiness in AI

Training Public Sector Employees

- *Bias in AI: Practical Examples in NLP & Computer Vision*
Canada Revenue Agency (CRA), Online, Jul-Aug 2022
Invited lecturer and panelist in a 6-week course.
- *Community of Practice on AI Peer Review*
Canada Revenue Agency (CRA), Online, Feb 2022-Ongoing.
Invited discussant to monthly meetings for establishing best AI peer review practices.
- *Fairness and Bias - Ethical Use of Artificial Intelligence*
Regional Municipality of York, Online, December 2021.
2-hour training lesson for employees (60+ in attendance).
- *Bias and Fairness in AI*
Canada Revenue Agency (CRA), Online, October 2021.
2-hour training lesson for employees (400 in attendance).

Training Private Sector Employees

- *Bias in AI: Practical Examples in NLP & Computer Vision*
Various Canadian Small-to-Medium Enterprises (SMEs), Online, Sep-Nov 2022
Invited lecturer and panelist in a 6-week course.
- *Trustworthy AI*
Vector Institute, Online, December 2021.
Invited for presenting insights and lessons learned to AI practitioners in a 7-week course.

Open-to-Public Panel Discussions

- *"Eye on A.I.: The Future of Artificial Intelligence"*
Toronto Public Library, Online, December 2021.
Invited panelist.
- *Panel Discussion on Fairness in AI*
Vector Institute for Artificial Intelligence & Ontario Centre of Innovation, Online, June 2021.
Invited panelist.

Research Funding (Past 5 Years)

Schwartz-Reisman Institute Faculty Fellowship Title: <i>Designing Fair and Efficient AI Technologies for Participatory Budgeting.</i> Amount: \$25,000	Nov 2020 - Dec 2021
NSERC Discovery Grant Title: <i>Using Fundamental Economic Solutions to Solve Real-World Problems.</i> Amount: \$195,000	Apr 2018 - Mar 2024
NSERC Discovery Grant Supplement Title: <i>Using Fundamental Economic Solutions to Solve Real-World Problems.</i> Amount: \$12,500	Apr 2018 - Mar 2024
Connaught New Researcher Award Title: <i>Using Economic Principles to Design Algorithms for Social Choice.</i> Amount: \$10,000	Apr 2018 - Mar 2020

Book Chapters

(*All chapters have alphabetical author ordering.)

- BC2. H. Aziz and N. Shah. *Participatory Budgeting: Models and Approaches*. In Rudas and Gábor (Eds.), *Pathways between Social Science and Computational Social Science: Theories, Methods and Interpretations*, pp. 215-236, Springer, 2021. **(Invited Chapter)**
- BC1. N. Shah. *Reverting to Simplicity in Social Choice*. In Laslier, Moulin, Sanver, and Zwicker (Eds.), *The Future of Economic Design: The Continuing Development of a Field as Envisioned by Its Researchers*, pp. 39-44, Springer, 2020. **(Invited Chapter)**

Journal Publications

(*All papers except J1 have alphabetical author ordering.)

- J14. S. Hossain and N. Shah. *The Effect of Strategic Noise on Linear Regression*. *Journal of Autonomous Agents and Multi-agent Systems (JAAMAS)*, Volume 35, Article 21, 2021. Supersedes the AAMAS-20 paper below.
- J13. G. Benade, A. D. Procaccia, S. Nath, and N. Shah. *Preference Elicitation for Participatory Budgeting*. *Management Science (MS)*, Volume 67, Number 5, pp. 2813-2827, 2021. Supersedes the AAAI-17 paper below.
- J12. A. Agarwal, D. Mandal, D. C. Parkes, and N. Shah. *Peer Prediction with Heterogeneous Users*. *ACM Transactions on Economics and Computation (TEAC)*, Volume 8, Number 1, Article 2, 2020. **Invited for the special issue on selected papers from EC-17.** Supersedes the EC-17 paper below.
- J11. I. Caragiannis, D. Kurokawa, H. Moulin, A. D. Procaccia, N. Shah, and J. Wang. *The Unreasonable Fairness of Maximum Nash Welfare*. *ACM Transactions on Economics and Computation (TEAC)*, Volume 7, Issue 3, Article 12, 2019. **Invited for the special issue on selected papers from EC-16.** Supersedes the EC-16 paper below.
- J10. D. Kurokawa, A. D. Procaccia, and N. Shah. *Leximin Allocations in the Real World*. *ACM Transactions on Economics and Computation (TEAC)*, Volume 6, Issue 3-4, Article 11, 2018. **Invited for the special issue on selected papers from EC-15.** Supersedes the EC-15 paper below.
- J9. I. Caragiannis, S. Nath, A. D. Procaccia, and N. Shah. *Subset Selection Via Implicit Utilitarian Voting*. *Journal of Artificial Intelligence Research (JAIR)*, Volume 58, pp. 123-152, 2017. Supersedes the IJCAI-16 paper below.

- J8. I. Caragiannis, A. D. Procaccia, and N. Shah. *When Do Noisy Votes Reveal the Truth?* ACM Transactions on Economics and Computation (TEAC), Volume 4, Number 3, Article 15, 2016. **Invited for the special issue on selected papers from EC-13.** Supersedes the EC-13 paper below.
- J7. A. D. Procaccia, N. Shah, and Y. Zick. *Voting Rules as Error-Correcting Codes.* Artificial Intelligence (AIJ), Volume 231, pp. 1-16, 2016. Supersedes the AAAI-15 paper below.
- J6. D. C. Parkes, A. D. Procaccia, and N. Shah. *Beyond Dominant Resource Fairness: Extensions, Limitations, and Indivisibilities.* ACM Transactions on Economics and Computation (TEAC), Volume 3, Number 1, Article 3, 2015. **Invited for the special issue on selected papers from EC-12.** Supersedes the EC-12 paper below.
- J5. K. Chatterjee, M. Henzinger, M. Joglekar, and N. Shah. *Average Case Analysis of the Classical Algorithm for Markov Decision Processes with Büchi Objectives.* Theoretical Computer Science (TCS), Volume 573, pp. 71-89, 2015. Supersedes the FSTTCS-12 paper below.
- J4. I. Kash, A. D. Procaccia, and N. Shah. *No Agent Left Behind: Dynamic Fair Division of Multiple Resources.* Journal of Artificial Intelligence Research (JAIR), Volume 51, pp. 579-603, 2014. Supersedes the AAMAS-13 paper below.
- J3. F. Cazals, T. Dreyfus, S. Sachdeva, and N. Shah. *Greedy Geometric Optimization Algorithms for Collection of Balls.* Computer Graphics Forum (CGF), Volume 33, Issue 6, pp. 1-17, 2014.
- J2. K. Chatterjee, M. Henzinger, M. Joglekar, and N. Shah. *Symbolic Algorithms for Qualitative Analysis of Markov Decision Processes with Büchi Objectives.* Formal Methods in System Design (FMSD), Volume 42, Issue 3, pp. 301-327, 2013. Supersedes the CAV-11 paper below.
- J1. M. Joglekar, N. Shah, and A. Diwan. *Balanced Group-Labeled Graphs.* Discrete Mathematics. Volume 312, Issue 9, pp. 1542-1549, 2012.

Archival Conference Publications

(*All papers have alphabetical author ordering.)

- C62. S. Ebadian, G. Kehne, E. Micha, A. D. Procaccia, and N. Shah. *Is Sortition Both Representative and Fair?* Proc. of 36th Annual Conference on Neural Information Processing Systems (NeurIPS), 2022. Forthcoming.
- C61. S. Ebadian, A. Kahng, D. Peters, and N. Shah. *Optimized Distortion and Proportional Fairness in Voting.* Proc. of 23rd ACM Conference on Economics and Computation (EC), pp. 563-600, 2022.
- C60. A. Borodin, D. Halpern, M. Latifian, and N. Shah. *Distortion in Voting with Top-t Preferences.* Proc. of 31st International Joint Conference on Artificial Intelligence (IJCAI), pp. 116-122, 2022.
- C59. S. Ebadian, R. Freeman, and N. Shah. *Efficient Resource Allocation with Secretive Agents.* Proc. of 31st International Joint Conference on Artificial Intelligence (IJCAI), pp. 272-278, 2022.
- C58. S. Ebadian, D. Peters, and N. Shah. *How to Fairly Allocate Easy and Difficult Chores.* Proc. of 21st International Conference on Autonomous Agents and Multi-Agent Systems (AAMAS), pp. 372-380, 2022.
- C57. A. Borodin, O. Lev, N. Shah, and T. Strangway. *Little House (Seat) on the Prairie: Compactness, Gerrymandering, and Population Distribution.* Proc. of 21st International Conference on Autonomous Agents and Multi-Agent Systems (AAMAS), pp. 154-162, 2022.
- C56. I. Caragiannis, N. Shah, and A. Voudouris. *The Metric Distortion of Multiwinner Voting.* Proc. of 36th AAAI Conference on Artificial Intelligence (AAAI), pp. 4900-4907, 2022.

- C55. I. Caragiannis, E. Micha, and N. Shah. *A Little Charity Guarantees Fair Connected Graph Partitioning*. Proc. of 36th AAAI Conference on Artificial Intelligence (AAAI), pp. 4908-4916, 2022.
- C54. S. Hossain, E. Micha, and N. Shah. *Fair Algorithms for Multi-Agent Multi-Armed Bandits*. Proc. of 35th Annual Conference on Neural Information Processing Systems (NeurIPS), pp. 24005-24017, 2021.
- C53. R. Freeman, E. Micha, and N. Shah. *Two-Sided Matching Meets Fair Division*. Proc. of 30th International Joint Conference on Artificial Intelligence (IJCAI), pp. 203-209, 2021.
- C52. D. Halpern and N. Shah. *Fair and Efficient Resource Allocation with Partial Information*. Proc. of 30th International Joint Conference on Artificial Intelligence (IJCAI), pp. 224-230, 2021.
- C51. H. Hosseini, D. Mandal, N. Shah, and K. Shi. *Surprisingly Popular Voting Recovers Rankings, Surprisingly!*. Proc. of 30th International Joint Conference on Artificial Intelligence (IJCAI), pp. 245-251, 2021.
- C50. E. Anshelevich, A. Filos-Ratsikas, N. Shah, and A. A. Voudouris. *Distortion in Social Choice Problems: The First 15 Years and Beyond*. Proc. of 30th International Joint Conference on Artificial Intelligence (IJCAI), Survey Track, pp. 4294-4301, 2021.
- C49. D. Peters, G. Pierczyński, N. Shah, and P. Skowron. *Market-Based Explanations of Collective Decisions*. Proc. of 35th AAAI Conference on Artificial Intelligence (AAAI), pp. 5656-5663, 2021.
- C48. D. Halpern, G. Kehne, D. Peters, A. D. Procaccia, N. Shah, and P. Skowron. *Aggregating Binary Judgments Ranked by Accuracy*. Proc. of 35th AAAI Conference on Artificial Intelligence (AAAI), pp. 5456-5463, 2021.
- C47. H. Hosseini, V. Menon, N. Shah, and S. Sikdar. *Necessarily Optimal One-Sided Matchings*. Proc. of 35th AAAI Conference on Artificial Intelligence (AAAI), pp. 5481-5488, 2021.
- C46. S. Barman, U. Bhaskar, and N. Shah. *Optimal Bounds on the Price of Fairness for Indivisible Goods*. Proc. of 16th Conference on Web and Internet Economics (WINE), pp. 356-369, 2020.
- C45. D. Halpern, A. D. Procaccia, A. Psomas, and N. Shah. *Fair Division with Binary Valuations: One Rule to Rule Them All*. Proc. of 16th Conference on Web and Internet Economics (WINE), pp. 370-383, 2020.
- C44. V. Gkatzelis, D. Halpern, and N. Shah. *Resolving the Optimal Metric Distortion Conjecture*. Proc. of 61st Annual IEEE Symposium on Foundations of Computer Science (FOCS), pp. 1427-1438, 2020.
- C43. R. Freeman, N. Shah, and R. Vaish. *Best of Both Worlds: Ex-Ante and Ex-Post Fairness in Resource Allocation*. Proc. of 21st ACM Conference on Economics and Computation (EC), pp. 21-22, 2020.
- C42. D. Mandal, N. Shah, and D. P. Woodruff. *Optimal Communication-Distortion Tradeoff in Voting*. Proc. of 21st ACM Conference on Economics and Computation (EC), pp. 795-813, 2020.

Courses Taught

Undergraduate Courses

Algorithmic Game Theory and Mechanism Design (CSC304)
Fall 2019, Fall 2018, Fall 2017.

Algorithm Design, Analysis, and Complexity (CSC373)
Fall 2021, Fall 2020, Fall 2019.

Graduate Courses

Algorithms for Collective Decision-Making (CSC2556)
Spring 2022, Spring 2021, Spring 2020, Spring 2019, Spring 2018.

Algorithm Design, Analysis and Theory (CSC2420)
Fall 2017.

Selected Professional Service

Workshop Organization

Workshop on the Distortion and Information-Efficiency Tradeoffs (DIET) at EC 2020.

Tutorial Organization

Distortion in Social Choice & Beyond at AAMAS 2022 and IJCAI 2022.

Participatory Budgeting at WINE 2021 (Invited).

Recent Advances in Fair Resource Allocation at EC 2019, AAAI 2020, and AAMAS 2020.

Chairmanships

2022 EC Tutorial Chair

2021 AAAI Focus Area on AI for Conference Organization and Delivery

Program Committees

(*AI4SI = AI for Social Impact)

EC Area Chair (2022), Senior PC (2020), PC (2019, 2018, 2017)

AAAI AI4SI* Track Senior PC (2022, 2020, 2019)

AAAI Main Track PC (2020, 2019, 2018, 2017)

IJCAI Senior PC (2021), PC (2022, 2019, 2018, 2017, 2016, 2015)

AAMAS Senior PC (2022, 2021)

TheWebConf/WWW Senior PC (2022, 2021), PC (2018)

WINE PC (2019)

NeurIPS PC (2020)

SAGT PC (2021)

Invited Talks

- T31. *Designing Optimal Voting Rules*, Summer School on Game Theory and Social Choice, City University of Hong Kong, Online, June 2022.
- T30. *Designing Optimal Voting Rules*, Cornell University, Ithaca, USA, April 2022.
- T29. *Pushing the Limits of Fairness in Resource Allocation*, University of Windsor, Online, March 2022.
- T28. *Participatory Budgeting Panel Discussion with Practitioners (Invited Panelist)*, WINE Conference, Online, December 2021.
- T27. *Participatory Budgeting (Invited Tutorial)*, WINE Conference, Online, December 2021.
- T26. *Group Fairness in Online Matching*, INFORMS Session on Fairness in Sequential Decision Making, Online, October 2021.
- T25. *Pushing the Limits of Fairness in Resource Allocation*, Undergraduate Summer Research Program, University of Toronto, Online, August 2021.
- T24. *Best of Both Worlds: Ex-Ante and Ex-Post Fairness in Resource Allocation*, Online Social Choice & Welfare Seminar, Online, August 2021.
- T23. *Designing Optimal Voting Rules via Distortion*, International Conference on New Directions in Social Choice, Online, July 2021.
- T22. *Fairness in Algorithmic Decision-Making: Theory & Applications*, Vector Institute Seminar Series, Online, December 2020.
- T21. *From Fair Division to Machine Learning: Preference-Based Notions of Algorithmic Fairness*, INFORMS Session on Fairness in Optimization and Machine Learning, Online, November 2020.
- T20. *Fairness in Algorithmic Decision-Making: Theory & Applications*, Schwartz Reisman Institute for Technology and Society (SRI) Seminar Series, University of Toronto, Online, October 2020.
- T19. *Making the World Fairer: Fair Division Theory & Applications*, Centre for Advancing Responsible and Ethical Artificial Intelligence (CARE-AI), Guelph University, Online, October 2020.
- T18. *Resolving the Optimal Metric Distortion Conjecture*, Computer Science Theory Group Seminar, University of Toronto, Online, August 2020.
- T17. *Pushing the Limits of Fairness in Resource Allocation*, 3rd Week of Mathematical Engineering and Applied Mathematics, Federal University of Rio de Janeiro (UFRJ), Online, July 2020.
- T16. *On the Communication-Distortion Tradeoff in Voting*, 1st Workshop on the Distortion and Information-Efficiency Tradeoffs, Online, July 2020.
- T15. *Resolving the Optimal Metric Distortion Conjecture*, International Seminar Series on Social Choice (COMSOC Video Seminar), Online, June 2020.
- T14. *Pushing the Limits of Fairness in Collective Decision-Making*, Indian Institute of Science (IISc), Bangalore, December 2019.
- T13. *Communication Complexity in Voting*, Workshop on Complexity in Algorithmic Game Theory at FSTTCS, Mumbai, December 2019.
- T12. *Fair and Efficient Collective Decisions*, Algorithmic Aspects of Social Choice and Auctions, St. Petersburg, August 2018.

- T11. *Fair and Efficient Collective Decisions*, Rensselaer Polytechnic Institute, June 2018.
- T10. *Fair and Efficient Collective Decisions*, University of Waterloo, June 2018.
- T9. *Optimal Social Decision Making*, AAMAS, May 2017 (invited talk as part of the Victor Lesser Distinguished Dissertation Award).
- T8. *How to Ask Residents to Vote Over Public Projects?*, Harvard University EconCS Seminar, March 2017.
- T7. *Computational Social Choice: For the People*, Harvard University CRCS Seminar, March 2017.
- T6. *Optimal Social Decision Making*, Carnegie Mellon University AI Seminar, February 2016.
- T5. *Leximin Allocations in the Real World*, Carnegie Mellon University Theory Seminar, November 2015.
- T4. *Leximin Allocations in the Real World*, Duke University CS-Econ Seminar Series, July 2015.
- T3. *Euclidean Voting & Prediction Markets*, Microsoft Research New York City, July 2013.
- T2. *Dynamic Fair Division of Multiple Resources*, Microsoft Research Cambridge, December 2012.
- T1. *On Agent Failures in Totally Balanced Cooperative Games*, Microsoft Research Cambridge, August 2012.
